OIL SPILL RESPONSE TRAILER
- Rapid response versatile equipment storage

PROVEN OIL SPILL TECHNOLOGY
OIL SPILL RESPONSE TRAILER

This specially designed trailer is dedicated to spill clean up and ensures all the equipment is kept in one place ready for rapid response. It contains most of the elements necessary to commence the cleanup operation immediately upon arrival.

Dependant on specifications and requirements, all equipment supplied with the trailer as standard is easily deployed with just 2 men, ensuring that the trailer can be used as a rapid response unit wherever required.

Included in the standard trailer package are:
Booms: For containment of the oils on site, TROILBOOM GP, however we can also offer other types of boom, eg RO-FENCE, A-BOOM or RO-BOOM.
Skimmer: A diesel driven rope mop skimmer, suitable for oil recovery in areas of minimal water depth or restricted access
Pump: A diesel driven diaphragm pump is supplied for recovered oil transfer. Alternatively it can also be used for high capacity skimming using the MINI-MAX small versatile weir skimmer, which will pick up only a small percentage of water.

Tank: 1000 to 10000 litre TROILTANKS are supplied dependant on the customers requirements.

Smaller quantities of oil may be recovered with the absorbent material. SORBAIDE oil snares are supplied for hand recovery of heavy oil. For final clear up or sweeping of water, absorbent booms are also included.

 Advantages of the TRAILER:
• Ideally suited for inland or harbour spills
• Easily deployed and operated by two men
• Highly transportable and high quality trailer, dedicated to spill cleanup
• Trailer includes skimmer, pump, storage, sorbents, protective clothing and tool set
• Customised equipment inventory available
• Large, rugged 2 or 4 wheeled design for convenience

TECHNICAL DATA

Standard contents;
Oil spill response trailer, 4-wheel twin axles fully galvanised that meets DOT/EEC regulations. Fitted with road lights, jockey wheel, strengthened rear loading ramp. Internal load tie down eyes, overrun brakes.
Payload 1,010 kg / 2,226 lbs L x W x H 4.19 x 1.9 x 2.28 m*

MINI-MAX floating weir skimmer with hose set and diesel driven SPATE pump. OM140D diesel driven mop skimmer with 30 m / 98 ft of 100 mm / 4 in mop and one floating tail pulley.
Patay hand pump DD120B with 6 m / 19 ft suction and discharge hose.
FASTANK, temporary storage tank - capacity 10,000 litres / 2,642 US gallons.
90 m / 295 ft TROILBOOM GP750 oil containment boom with two tow ends,
1 x bale of four polypropylene oil absorbent boom each 0.2 m / 8 in diameter, 3 m / 10 ft long.
2 x 10 kg / 22 lb packs loose oil absorbent, 1 x hand mop kit comprising of two polypropylene mops with wringer bucket, 1 x absorbent scoop, 1 x pack 10 filter bags,
1 x box of 100 SORBAIDE heavy oil absorbent “pom poms”,
50 x heavy-duty plastic bags, 1 x hand cleaner, 1 x rigger’s kit with leather holster, 2 x sets of protective clothing,
2 x ‘Hazard Oil Spill’ signs, 50 m / 164 ft orange boundary marking tape, 1 x TROILTANK capacity 600 litres / 1587 US gallons, 50 m / 164 ft polypropylene rope and 2 x 4 kg anchors.

*Customised Options
On request we can provide custom configurations. A selection of open or box trailers can be supplied fitted with a range of options, such as additional doors, larger capacity and internal and external working lights.
